KPI	Actual display	Target display	Actual value	Target value	Delta	Status	Action note
Discovery coverage	40/40	>= 90% of requested jobs	1	0.9	+10.0pp vs target	On track	Maintain current strategy and monitor trend stability.
Scoring coverage	40/40	>= 95% discovered jobs scored	1	0.95	+5.0pp vs target	On track	Maintain current strategy and monitor trend stability.
Approval conversion	87.5%	>= 35%	0.875	0.35	+52.5pp vs target	On track	Maintain current strategy and monitor trend stability.
Apply readiness	35/35	>= 75% approved jobs	1	0.75	+25.0pp vs target	On track	Maintain current strategy and monitor trend stability.
Live submission success	0/35	>= 40% of apply attempts	0	0.4	-40.0pp vs target	Needs attention	Prioritize direct ATS portals, enforce manual CAPTCHA assist, and resolve portal auth blockers.
Feedback quality	66.7%	>= 70% accepted	0.6667	0.7	-3.3pp vs target	Needs attention	Require structured feedback fields (expected vs actual, portal, job id) before ingestion.
Operational reliability	No critical errors	No critical errors	1	1	+0.0pp vs target	On track	Maintain current strategy and monitor trend stability.

Executive narrative

2 KPI areas need attention: Live submission success, Feedback quality

Action: Live submission success: Prioritize direct ATS portals, enforce manual CAPTCHA assist, and resolve portal auth blockers.

Action: Feedback quality: Require structured feedback fields (expected vs actual, portal, job id) before ingestion.

Strengths: Discovery coverage, Scoring coverage, Approval conversion, Apply readiness

Product analytics (MLflow sync)

Metric	Value
Success rate (live submit)	0.0%
MLflow tracking	Enabled
Evaluator score (latest)	0.0
Debugger auto-corrections	6

Executive summary (cost vs jobs applied)

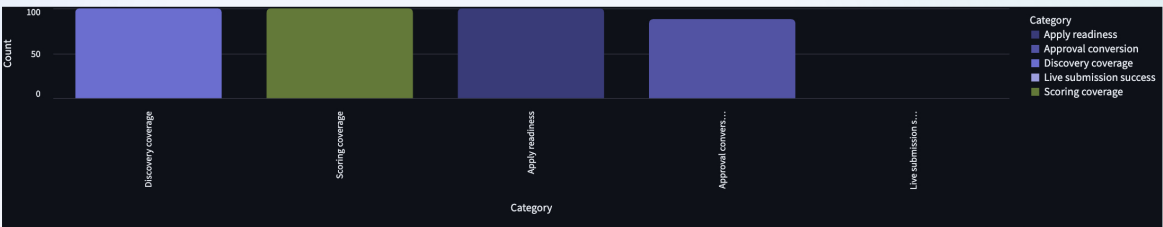

Download executive_cost_vs_jobs CSV

Download executive_cost_vs_jobs JSON

Metric	Value
Estimated cost (USD)	0.0656
Jobs applied	0
Cost per applied job (USD)	None
Jobs discovered	40
Jobs approved	35

Stakeholder KPI telemetry

Stakeholder KPI telemetry (%)

Download stakeholder_kpi_telemetry CSV

Download stakeholder_kpi_telemetry JSON

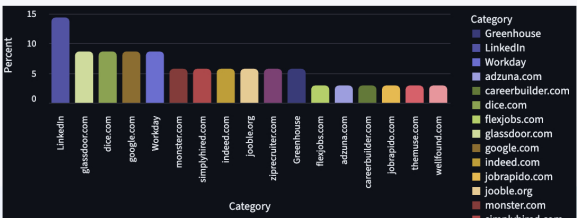

Metric	Value	Why it matters
Discovery coverage	100.0%	How much of requested discovery capacity was fulfilled.
Scoring coverage	100.0%	How much of discovered inventory received scoring.
Approval conversion	87.5%	Pipeline selectivity after LS evaluation.
Apply readiness	100.0%	Approved jobs that reached actionable apply state.
Live submission success	0.0%	Direct portal submission reliability.

Feedback sources

Product goals

Product goals visual

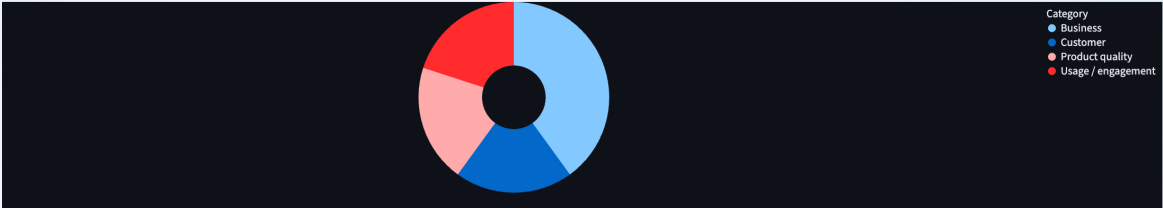

[Download product goals CSV](#) [Download product goals JSON](#)

Goal	Current signal	Why it matters
Increase relevant job discovery	40	Measures top-of-funnel search coverage.
Improve recommendation quality	98%	Tracks best-fit scoring quality for the candidate.
Convert recommendations into action	35	Shows how many approved jobs reached draft/apply preparation.
Learn from real user signals	50	Feeds optimization and product refinement.

KPI groups

KPI groups by category

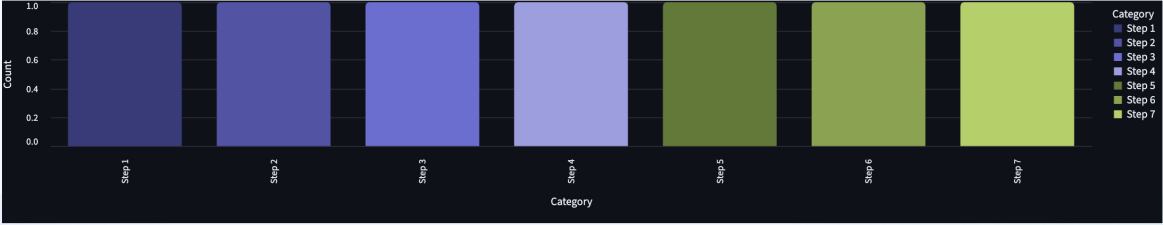

[Download product kpi CSV](#) [Download product kpi JSON](#)

Category	KPI	Value	Meaning
Customer	Accepted feedback	2	Validated user/employer signals useful for optimization.
Product quality	Pipeline errors	0	Operational issues that degrade trust or completion.
Usage / engagement	Current run feedback	50	How actively users are responding to recommendations.
Business	Interview predictions	35	Proxy for downstream conversion potential.
Business	Application packages	35	Prepared submissions ready for human review or execution.

How this product works

Lifecycle map

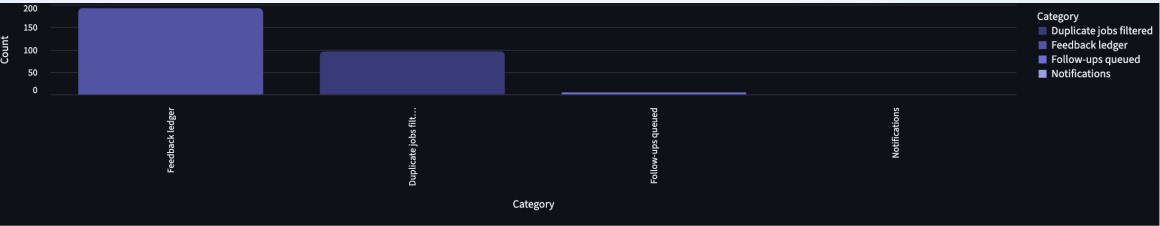

[Download product lifecycle CSV](#) [Download product lifecycle JSON](#)

Step	Description
1. Understand goals	Target roles, geography, work mode, salary range, and approvals are set before the run starts.

2. Check your data	Resume parsing, extracted skills, and source telemetry shape discovery and ranking.
3. Choose KPIs	The run tracks discovery, approvals, draft generation, application preparation, notifications, and feedback learning.
4. Create your dashboard	Mission Control combines operations, analytics, and user-facing product insight in one place.
5. Integrate systems	Email, SMS, tracing, storage, and auth plug in through the backend configuration.
6. Share with others	Downloadable CSV/JSON exports support product, engineering, and ops reviews.
7. Keep measuring progress	Feedback sync and learning loops refine targeting and strictness over time.
